Contents of Volume 19

No. 1

Research Papers

P. Gött, L. Zöller, S. Yang, R. Stohwasser, E.K.F. Bautz and G. Darai (F.R.G.)
Antigenicity of hantavirus nucleocapsid proteins expressed in *E. coli* 1

R.K. Akkina, J.C. Richardson, M.C. Aguilera and C.-M. Yang (U.S.A.)
Heterogeneous forms of polymerase proteins exist in influenza A virus-infected cells 17

D.G. Macejak and R.B. Luftig (U.S.A.)
Stabilization of actin filaments at early times after adenovirus infection and in heat-shocked cells 31

D. Antic, B.-U. Lim and C.Y. Kang (Canada)
Molecular characterization of the M genomic segment of the Seoul 80–39 virus; nucleotide and amino acid sequence comparisons with other hantaviruses reveal the evolutionary pathway 47

D. Antic, B.-U. Lim and C.Y. Kang (Canada)
Nucleotide sequence and coding capacity of the large (L) genomic RNA segment of Seoul 80-39 virus, a member of the hantavirus genus 59

R.K. Akkina (U.S.A.)
Pestivirus bovine viral diarrhea virus polypeptides: identification of new precursor proteins and alternative cleavage pathways 67

Y. Yu, C.A. Kamps, P.H. Yuen and P.K.Y. Wong (U.S.A.)
Construction and characterization of expression systems for the *env* gene of *ts*1, a mutant of Moloney murine leukemia virus-TB 83

L.A. King, S.G. Mann, A.M. Lawrie and S.H. Mulshaw (U.K.)
Replication of wild-type and recombinant *Autographa californica* nuclear polyhedrosis virus in a cell line derived from *Mamestra brassicae* 93

A.I. Klimov, N.I. Sokolov, N.G. Orlova and V.P. Ginzburg (U.S.S.R.)
Correlation of amino acid residues in the M1 and M2 proteins of influenza virus with high yielding properties 105

A. Rösen-Wolff and G. Darai (F.R.G.)
Identification and mapping of the UL56 gene transcript of herpes simplex virus type 1 115

Book Reviews 127

No. 2

Research Papers

B.G.-T. Pogo, A.C.-K. Lai, M.E. Joesten, M.E. Royston and D. Holloway (U.S.A.)
Changes in cell gene expression in human leukemic cells persistently infected with vaccinia virus 131

L.H. Nel and H. Huismans (South Africa)
Synthesis of the virus-specified tubules of epizootic haemorrhagic disease virus using a baculovirus expression system 139

B. Eberlein, A. Baur, M. Neundorfer and G. Jahn (F.R.G.)
Expression of human immunodeficiency virus (HIV) in naturally infected peripheral blood mononuclear cells: comparison of a standard co-culture technique with a newly developed microculture method 153

J.D. Martin and P. Li (U.S.A.)
Comparison of regulatory sequences and enhancer activities of SV40 variants isolated from patients with neurological diseases 163

K.L. Neufeld, O.C. Richards and E. Ehrenfeld (U.S.A.)
Expression and characterization of poliovirus proteins $3B^{VPg}$, $3C^{pro}$, and $3D^{pol}$ in recombinant baculovirus-infected *Spodoptera frugiperda* cells 173

M.P. Landini, B. Severi, G. Cenacchi, T. Lazzarotto, W. Lindenmeier and A. Necker (Italy, F.R.G.)
Human cytomegalovirus structural components: intracellular and intraviral localization of p38 189

C. Bovolenta, M. Tognon and E. Liboi (Italy)
Epidermal growth factor induces, in the ELα4-2 cell line, herpes simplex virus-1 α4 gene transcription in the absence of the viral trans-activator VP16 199

J.M. Brinker, Z. Ziaie and N.A. Kefalides (U.S.A.)
Differential suppression of host cell protein synthesis and mRNA levels in herpes simplex virus-infected endothelial cells 209

J. Kövamees, M. Blixenkrone-Möller and E. Norrby (Sweden, Denmark)
The nucleotide and predicted amino acid sequence of the attachment protein of canine distemper virus 223
